
Forget overpriced schools, long days in a crowded classroom, and pitifully poor results. These websites and apps cover myriads of science, art, and technology topics. They will teach you practically anything, from making hummus to building apps in node.js, most of them for free. There is absolutely no excuse for you not to master a new skill, expand your knowledge, or eventually boost your career. You can learn interactively at your own pace and in the comfort of your own home. It's hard to imagine how much easier it can possibly be. Honestly, what are you waiting for?

If you've ever been afflicted with writer's block... and who hasn't?... you'll know the frustration and agony of staring at a blank page or screen and just not knowing what to write next. Writer's block is perhaps the most common reason people give up on writing. It's an integral part of writing, but it doesn't have to be permanent. Here are some resources that might help you overcome this terrible affliction:

Coding is a skill in high demand, and high pay. If you want to learn how to code well, you could try one of these resources:

Sometimes we feel like we're getting nowhere with depression and anxiety and we need a little boost to remind us that we're doing well. And sometimes, some reminders are just plain fun. You can do that by using one of these resources:

##

For some people, the world is unacceptably complicated. For some people, it's just downright scary. If you're ready for some help to understand the world around you and how it works, give these resources a try:

Sometimes you hear about scientific breakthroughs on the news but wonder what they actually mean for daily life. These resources explain it all, from quantum mechanics to economics.

We all want different things at different times for different reasons. If you're curious about what you can do with your brain, this article is for you.

##

The internet is a massive resource of information, knowledge, wisdom, answers to questions, answers to everything. It's also a massive cesspool of misinformation. This is an attempt to sort through it all and figure out which sites are worth your time and which are best left alone.

It's no secret: social media has many, many downsides--not only to our privacy but also to our well-being and mental health. But there are upsides as well. This weekend we're going to look at three websites that help people overcome the negative effects of social media and use them for good instead.

This website is like a virtual candy store, where you can take a journey through the world to find tons of cool stuff worth looking at and perhaps even purchasing or borrowing--if you can afford it or can find it wherever you live.
